Experience

Lets Grow More Jan 2022 – Feb 2022
Web Development Intern *Remote*

- created a single-page coffee website using HTML, CSS, and Javascript, and it was fully responsive and user-friendly.
- Also created a User card Layout, in which the user can get the user's data by clicking the get user button, after which the data will be fetched and displayed on the website.

Projects

Tasty Bites: Food Ordering Website | GitHub | (Live Site Here)

- Developed a food ordering website where customers can order food from the menu. You can also search for food, and the menu will be displayed based on your input.
- Filtering the menu based on the customer's preferences is also available, so that the customer can enjoy his or her happy meal as desired.
- Technologies Used: ReactJs, HTML, CSS, Javascript, Netlify(Hosting)

Finology: Investing Website | GitHub | Live site here

- Developed a completely responsive online investing website that helps people invest in Indian and US stocks, Mutual funds, etc., and they can also easily track their invested money.
- Finology comes with a special feature where a Sip calculator is built in, making it simple for users to set goals and make investments.
- Technologies Used: HTML, CSS, Javascript.

Girgit: Online E-commerce Website | GitHub | Live site here

- Developed a completely responsive online e-commerce website where people can buy various varieties of trendy clothes.
- All the products are clickable, people can read all the details of the product and choose their size to ensure a proper fit.
- An Add to Cart option is added to display the total cost to be paid by the customer
- Technologies Used: HTML, CSS, Javascript.

Profile Links
